

The leading
learning solution
exclusively for
pediatric professionals

Children's Hospital Association

Pediatric Arrhythmia Recognition and Care Management Library

This solution addresses the full breadth of arrhythmias seen in the pediatric population, as well as temporary and permanent pacemakers and implantable cardioverter defibrillators (ICDs). This comprehensive series allows the clinician to progress from learning the foundations of ECG rhythm analysis — cardiac electrophysiology, ECG waveforms and intervals, and a systematic approach to interpretation — to the basic and complex arrhythmias both commonly and not so commonly seen in children.

Pediatric Arrhythmia Recognition and Care Management Library

Arrhythmia Assessment (Comprehensive Test)
Arrhythmia Recognition: Analyzing the ECG Rhythm Strip
Arrhythmia Recognition: Atrial
Arrhythmia Recognition: Atrioventricular Blocks
Arrhythmia Recognition: Channelopathies
Arrhythmia Recognition: Electrophysiology
Arrhythmia Recognition: Junctional
Arrhythmia Recognition: Just the Basics for the Pediatric Clinician
Arrhythmia Recognition: Lines, Waveforms and Segments
Arrhythmia Recognition: Sinus
Arrhythmia Recognition: Structure and Function of the Heart
Arrhythmia Recognition: The Cardiac Monitor
Arrhythmia Recognition: Ventricular
Permanent Pacemakers and ICDs
Temporary Pacemakers
