

UNITING PERSPECTIVES. INFORMING DECISIONS.

Community Health Affinity Group

When you participate in a Children's Hospital Association affinity group, you help transform collective insight into continuous improvement and lasting impact. You'll discover a network of like-minded peers to explore issues, challenge norms, and learn together.

The agendas of the Community Health Affinity Group are uniquely designed for those working in community health and community benefit. Their primary focus areas include:

- Strategy and implementation of Community Health Needs Assessments
- Topics of interest, such as addressing social drivers of health, mobile health, partnerships with schools, and more.
- Networking
- Leadership development
- Community health industry trends and challenges

Participation limitations: Enrollment is for one year and is at the hospital level. The affinity group is not restricted by role or title and is appropriate for individuals with domain in community health or community benefit. While not an improvement project, the group could identify and pursue benchmarking opportunities.

In-person meetings will be held:

- April 22-24, 2026 in Miami, Florida, hosted by Nicklaus Children's Hospital
- Fall meeting will be announced in early 2026.

Each hospital's \$4,000 annual program fee covers the affinity group cost for up to three participants at in-person events. Virtual access to online resources is unlimited, as approved by the primary contact.

Your involvement ensures robust dialogue, meaningful engagement, and productive discussions. We look forward to connecting with you.
