

COMPARE SURGICAL SERVICES

BACKGROUND

More than 30 children's hospitals use a pediatric dataset developed by and for operating room (OR) directors to assess the financial and operational performance of surgical services. Participating hospitals can view a report package that contains departmental data as well as benchmark against their peers. Executive reporting features support communication with hospital leadership.

BENEFITS & USE

Participants collaborate with the Children's Hospital Association to:

- Hospitals provide key operational and financial surgical services data for Main OR, PACU and Ambulatory Surgery Center
- Access action-oriented comparison reports to maintain and improve operational processes and reduce departmental costs
- Learn effective practices through networking

RESOURCES

- Standard reports
- Virtual web conference to review trends

DATA FREQUENCY & REPORTING

Data are submitted bi-annually in advance of the Association- led conference(s) to facilitate hospital stories, access to the reporting

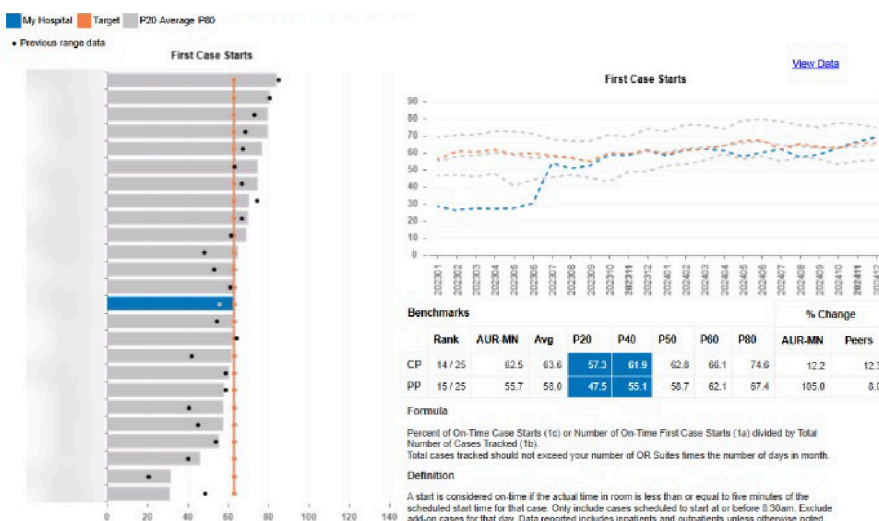

KEY METRICS AT-A-GLANCE

- Add-Ons
- Cancellations
- On-Time First Case Starts
- Turnover Time
- Room Utilization
- OR Length of Case
- PACU Length of Stay
- Cases by Specialty
- Worked Hours per Case Hour
- Paid Hours per Case Hour
- Total Cost per Case Hour
- Salary Cost per Case Hour
- Supply Cost per Case Hour

WHO MAY BE INTERESTED

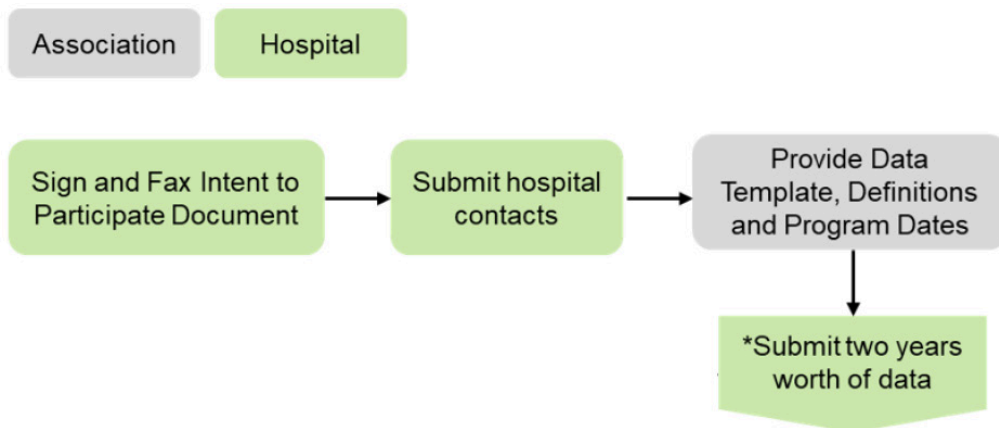

Hospital leadership, operating room directors and business managers

Percent On-Time First Case Starts

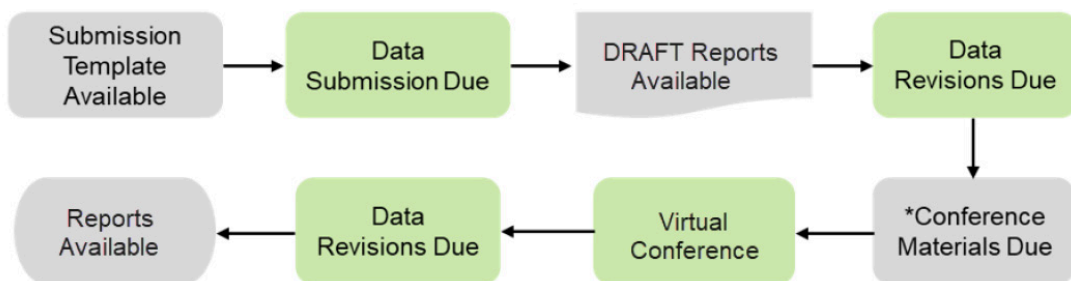

PARTICIPATION

All Association members are eligible to join this data program.
