

PEDIATRIC ARRHYTHMIA RECOGNITION AND MANAGEMENT CARE LIBRARY COURSE LIST

Strengthen clinicians' skills in recognizing and managing the full breadth of pediatric arrhythmias with this interactive course series. Expert-developed courses address the physiology, ECG criteria, causes and triggers, clinical manifestations, and treatment of arrhythmias. This series also covers temporary and permanent pacemakers and implantable cardioverter defibrillators.

Arrhythmia Assessment (Comprehensive Test)
Arrhythmia Assessment: Common Pediatric Rhythms
Arrhythmia Recognition: Analyzing the ECG Rhythm Strip
Arrhythmia Recognition: Atrial
Arrhythmia Recognition: Atrioventricular Blocks
Arrhythmia Recognition: Channelopathies
Arrhythmia Recognition: Electrophysiology
Arrhythmia Recognition: Junctional
Arrhythmia Recognition: Just the Basics for the Pediatric Clinician
Arrhythmia Recognition: Lines, Waveforms and Segments
Arrhythmia Recognition: Sinus
Arrhythmia Recognition: Structure and Function of the Heart
Arrhythmia Recognition: The Cardiac Monitor
Arrhythmia Recognition: Ventricular
Permanent Pacemakers and ICDs
Temporary Pacemakers
